

## **Job Description & Job Code SE-TP-IN-01**

**Title: Associate DevOps Engineer - Technology Practice**

**Location: Hybrid, flexible, periodic physical meetings/work required**

At Limendo, our people & technology enable business innovation. We've established ourselves as a leading employer in Bolzano and are now turning our heads to Bengaluru. We're looking for a highly skilled Devops engineer(s) to join our technology practice team.

Our DevOps engineer(s) will be responsible for deploying product updates, identifying production issues and implementing integrations that meet our products/customers' needs. If you have a solid background in software engineering and are familiar with Ruby or Python, we'd love to speak with you.

Our ideal candidate will have expert knowledge of software development processes and solid experience building, testing and deploying applications in cloud. If finding issues and fixing them with beautiful, meticulous code.

### **Objectives of this Role**

- Building and setting up new development tools and infrastructure
- Understanding the needs of stakeholders and conveying this to developers
- Working on ways to automate and improve development and release processes
- Testing and examining code written by others and analyzing results
- Ensuring that systems are safe and secure against cybersecurity threats
- Identifying technical problems and developing software updates and 'fixes'
- Working with software developers and software engineers to ensure that development follows established processes and works as intended
- Planning out projects and being involved in project management decisions

### **Daily and Monthly Responsibilities**

- Deploy updates and fixes

- Build tools to reduce occurrences of errors and improve customer experience
- Develop software to integrate with internal back-end systems
- Perform root cause analysis for production errors
- Investigate and resolve technical issues
- Develop scripts to automate visualization
- Design procedures for system troubleshooting and maintenance

### **Skills and Qualifications**

- B.Engg in Computer Science, Engineering or relevant field
- Experience as a DevOps Engineer or similar software engineering role
- Proficient with git and git workflows
- Good knowledge of Ruby or Python
- Working knowledge of databases and SQL
- Problem-solving attitude
- Collaborative team spirit
- Preferred Qualifications
- Master's degree in Computer Science or Software Engineering
- Experience with software engineering, customer experience & systems engineering
- Experience developing engineering applications for a large corporation
